Technical Specification		
Product: Lemon Pulp 1.5mm	Last Update: 31/01/2023	Product Code: LEM011

ORIGIN: Spain

GENERAL The product shall be prepared from fresh sound raw material that is free from all toxic residues and taints and shall comply with all current UK/EU Food Legislation. The product is not intended for direct consumption.

INGREDIENTS Lemon (80-100%), Water (0-20% maximum);

PROCESSING All fruit is washed and rinsed, prior to sorting to eliminate under and over ripe fruit, infested and damaged lemons. Fruit is conveyed to the Kelly machine which is set to quarter the lemons and separate the peel from the fruit centres. The peel is shredded to 1.5 mm (+/- 0.5mm) in width with no crosscut applied thus being natural length. The peel and the dummy are cooked to inactivate enzymes. The peel, dummy and water, if required, are blended together, by percentage, to give the equivalent in the original orange and the pulp is heated to min 87C for canned product or min 98C for aseptic product.

PACKING Pulp passes through a metal detector and is either: a) hot-filled into lacquered cans or: b) pasteurized and filled into aseptic bags in drums. Finished product is stored at ambient.

QUALITY Free from rot, pips, blemishes and foreign material.

ORGANOLEPSIS White to yellow coloured pulp with lemon peel pieces. Typical lemon flavour and aroma.
